

M Naga Vijay Rohit

AI Engineer — Generative AI · RAG Architecture · Agentic Systems · AI System Design

+91-9493538595 | mantharohit03@gmail.com | linkedin.com/in/RohitMantha | github.com/RohitMantha | rohitmantha.github.io/portfolio

PROFESSIONAL SUMMARY

AI Engineer who builds production **Generative AI** systems that companies actually ship. Specialized in **RAG architecture**, **agentic AI orchestration**, and **LLM inference optimization**. Deployed document intelligence systems processing **1,200+ financial documents daily** with **86% retrieval accuracy**. Proven track record of reducing manual workflows by **65%** through **AI automation** and **AI system design**.

TECHNICAL SKILLS

Generative AI	RAG Architecture, LangChain, LangGraph, LlamaIndex, Prompt Engineering, Agentic AI, Fine-Tuning (LoRA), OpenAI / Gemini API
ML & Data	PyTorch, HuggingFace Transformers, Sentence-Transformers, Vector Search (ChromaDB, Pinecone, FAISS), PostgreSQL, Redis
Languages	Python, JavaScript / TypeScript, C#, SQL
Infrastructure	FastAPI, Docker, Kubernetes, Git, CI/CD, Azure DevOps, AI Observability, Model Evaluation (Evals)

EXPERIENCE

Sciforn Solutions Pvt. Ltd

Dec 2025 – Present

AI Engineer

Pune, India

- Deployed a **production RAG pipeline** using **LangChain** and **ChromaDB** with **semantic vector search**, automating financial document extraction and reducing manual review time by **65%**.
- Engineered **agentic AI workflows** via **LangGraph** to orchestrate multi-step document processing, enabling autonomous parsing of **1,200+ PDFs daily** with built-in **token budget management**.
- Implemented **hybrid retrieval** (dense + BM25 + re-ranking) with **model evaluation** via RAGAS, achieving **86% Context Precision** and **91% Faithfulness**.
- Deployed **Generative AI** microservices using **FastAPI** + **Docker** with **AI observability** dashboards, achieving **p95 latency under 800ms** for 500+ concurrent requests.

LTIMINDTREE

Jun 2025 – Dec 2025

MLOps Engineer

Pune, India

- Designed automated **ML model validation pipelines** using Azure DevOps, reducing deployment regression cycles by **30%** and enabling zero-downtime production releases.
- Built **data integrity frameworks** for ML training data during backend migrations, seamlessly processing **2M+ records** with zero data loss across 3 production databases.
- Implemented **CI/CD pipelines** for containerized model deployment with automated **model drift detection**, reducing production incidents by **40%** through real-time alerting.

MDI AI Detection LLC

Dec 2024 – May 2025

ML Engineer — Intern

Remote, USA

- Optimized **ML inference pipelines** for edge deployment using model quantization (FP16/INT8), achieving **3.2x inference speedup** while maintaining **96%+ accuracy** on production workloads.
- Deployed scalable real-time **inference APIs** processing **30+ concurrent data streams** using FastAPI with async processing and **latency optimization**.
- Implemented **active learning** with human-in-the-loop workflows, reducing false positives by **35%** with only 15% additional labeled data, demonstrating **responsible AI** practices.

PROJECTS

Enterprise RAG Pipeline for Document Intelligence

LangChain · ChromaDB · FastAPI

- End-to-end **RAG system** over 50K+ documents with hybrid retrieval, achieving **78.2% Context Precision**.
- Production **FastAPI** deployment with streaming responses, query caching, and token-usage monitoring.

Multi-Agent AI Orchestration Platform

LangGraph · CrewAI · OpenAI API

- Agentic AI platform** with autonomous agents for research and analysis, reducing complex task times to **<3 minutes**.
- Human-in-the-loop validation with approval gates, configurable guardrails, and per-agent cost tracking.

AI Finance Assistant — Document Q&A

Gemini API · ChromaDB · LangChain

- Intelligent Q&A system enabling natural language queries over financial reports using **512-token semantic chunking**.

EDUCATION

Vellore Institute of Technology, Chennai

2021 – 2025

Bachelor of Technology in Computer Science and Engineering (AI & ML) — CGPA: 8.75 / 10

Sri Venkateswara Junior College, Visakhapatnam

2019 – 2021

Higher Secondary School (MPC) — 90.2%

Sri Chaitanya School, Visakhapatnam

2018 – 2019

Secondary School — 10.0 CGPA
